

Less weight. More possibility.

Composite materials and engineering support for rail, marine and automotive interiors.

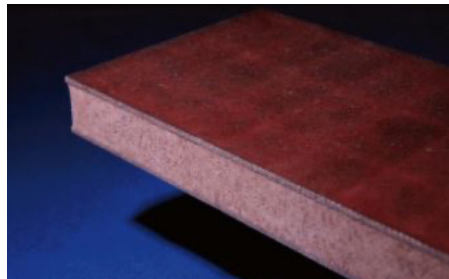

ONE MATERIAL PARTNER. THREE PRODUCT FAMILIES.

RECORE P

Phenolic composite panels

Interior panels, partitions, doors and fabricated components.

RECORE LightFloor

Composite flooring

Floorboards and floor-system concepts for passenger environments.

Ducts & moulded parts

Application-specific shapes

Air ducts, curved sections and shaped interior components.

ENGINEER AROUND THE CHALLENGE

Weight & stiffness

Consider mass and structural needs together.

Fire performance

Select materials around the application requirements.

Passenger comfort

Address thermal, acoustic and vibration priorities.

Practical integration

Resolve shaping, joining and finishing early.

Bring us your application.

sales@recoreindustries.com | recoreindustries.com

Beyond the material. Alongside your team.

Define the challenge. Agree the outputs. Move your programme forward.

01 / CONSULTING

Requirements brief, material options review and prioritised development recommendations.

02 / DESIGN

Component concepts, interface and joining proposals, and design-for-manufacture review.

03 / ENGINEERING

Application development plan, prototype requirements and validation planning.

04 / COMPETENCE CENTRE

Tailored training, practical processing guidance and a documented team action plan.

Scope, deliverables and responsibilities are agreed for each engagement.

SWEDISH HERITAGE. TRANSPORT APPLICATIONS.

Rail flooring

Combi Plus is identified in the published LightFloor portfolio.

Marine heritage

Viking Line appears in the Artboard / Recore reference portfolio.

Automotive applications

Interior materials for motorhomes and other passenger vehicles.

START A TECHNICAL CONVERSATION

Send a short project brief: your application, key requirements and timing. We will discuss material fit and the next step. Confidentiality arrangements can be agreed before sensitive information is exchanged.
